DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The abstract is objected for exceeding more than 150 words.
Appropriate correction is required.

Allowable Subject Matter

1. Claims 1-11 would be allowable after the objected Abstract and 112 issues are corrected.

The following is an examiner's statement of reasons for allowance:

The allowable subject matter in claims 1, 4, 7 pertains a method of measuring, for a signal S, the Unit Interval of a logical ONE, the method comprising the steps of: (a) initializing a register R of k-many cells R:[1-k] to all ONEs; and then subsequently (b) delaying each transition in the signal S by selected amounts of k-many successive consecutive delays to produce a respective collection of Delayed Signals DS:[1-k], DS:(i+1) being delayed from DS: i, i=1, 2, . . . , k-1, the cumulative amount of delay from a transition in S to the corresponding transition in DS:k being at least as long as the longest unit interval to be measured; (c) clocking logical ZEROs among the DS:[1-k] into the corresponding and respective cells R: [1-k] upon a ONE-to-ZERO transition in the

signal S to clear those cells while not using any ONEs to set their respective cells; (d) repeating steps (b) and (c) for a selected duration; and then (e) capturing the values of the k-many cells R: [1-k] and taking remaining ONEs therein as an indication, in units corresponding to the consecutive delays, of the Unit Interval of a logical ONE for the signal S. The aspect of claims 1, 4 and 7 are the above neither anticipated nor obviated by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

This application is in condition for allowance except for the objections to the abstract.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
